

AXIS Q8632-E PT Thermal Network Camera

VGA thermal imaging with pan/tilt positioning

AXIS Q8632-E PT Thermal Network Camera, with VGA resolution, is quick and accurate, allowing the user to have one PT camera with pre-sets instead of several fixed thermal cameras to cover an area. The deterrent design is compliant with IP66 and NEMA 4X for protection against dust, rain and snow. Ideal for high-security industrial and infrastructure installations such as data centers, solar/power plants and electrical substations, as well as borders and harbors. In places with high risk for dust, salt, sand and emission of soot from vehicles, a washer can be purchased to spray cleaning fluid on the window.

- > VGA thermal imaging
- > High speed pan/tilt
- > Continuous pan, 360° endless
- > Water and dust resistant
- > -40 °C to 55 °C (-40 °F to 131 °F)
